

Features/Functionality

- Quickly and easily see a variety of different food establishments
- Be able to clearly determine the quality of food
- Have a option to filter based on diet/food preferences/allergies/etc
- A way to understand how long the food would take to be delivered
- Suggestions based on selected preferences (if they prefer consistent kind of food or want a variety)

User Stories:

- As a **restaurant chef**, I want to be able to clearly understand the specifics of an order being placed so that I can prepare the meal according to the customers wants and needs.
- As a **restaurant owner**, I want to be able to use this app to promote my restaurant so that I can attract new customers.
- As a **party host**, I want to be able to easily compile a large number of orders so that I can quickly and efficiently get food for my guests.
- As a **person traveling in a new area**, I would like to be able to get suggestions on new and exciting places to eat in my area so I can fully enjoy and experience the new place I am in.
- As a **delivery employee of DeliCourier**, I want to be able to clearly understand the order I am picking up so I can ensure I receive the correct delivery.
- As a **busy working individual**, I want to be able to quickly place an order from my favorite restaurants without having to dig through the app so that I can devote my time to my work.

Name for App: Delicourier
